

CHRIST EPISCOPAL SCHOOL

STATEMENT OF PURPOSE

Mission Statement:

Christ Episcopal School is a diverse community of learners who participate in an enriched academic program in a nurturing Christian environment which fosters a dedication to service and a love of lifetime learning.

The Purposes and Objectives of the School:

The major purpose of elementary education is to ensure opportunities for children to develop intellectually, socially, physically, emotionally, and spiritually to their fullest potential. The most important responsibility of the staff at Christ Episcopal School is to provide all students with the opportunity to develop fully their intellectual and cultural curiosity. The faculty and staff are committed to developing a desire in children for knowledge and learning, and through a wide variety of instructional techniques, to teach the skills that will facilitate learning, creativity, and the development of critical thinking.

All faculty and staff strive to encourage self-motivation and to provide the skills that will enable students to become independent learners in an environment where dignity and self-esteem are nurtured. The cohesiveness that is Christ Episcopal School comes from mutual caring, respect, and interest.

Classes are generally small in order to enhance close relationships among students, teachers, and parents. The enriched curriculum at Christ Episcopal School is designed to inspire. Parents are expected to participate in the education of their children and to support the school's events and fundraisers with their care, time, and resources. Because of this support, a varied, enriched, academic program can be offered.

Educational methods practiced at Christ Episcopal School ensure our students are prepared to enter public middle school. Through enrichment and a strong academic program, students are well prepared academically as indicated by the performance of our students on the nationally-normed Stanford Achievement Test. This test is administered to children in grades three through five each spring.

Beyond the core curriculum, enrichment teachers provide instruction in physical education, technology, music, art, Spanish, library, and Christian Education. During several "special emphasis" weeks: Book Week, Science Week, and Fine Arts Week, professors from Stephen F. Austin State University, parents, and individuals from the community demonstrate, perform, lead educational tours, and provide special activities for the students of the school.

The faculty and staff serve as role models in their own behavior to build self-esteem and a desire to learn in the children. They believe in and model Christian ideas and respect the worth of the individual. The value of structure is acknowledged and made use of, but flexibility in thinking and action is necessary to live together, to try new ideas, and to allow children to grow and mature appropriately. Working together as a team, faculty and staff, Head of School, parents and students, strive to create an atmosphere that builds confidence and high self-esteem so that students may become well-educated life-long learners with a desire to serve God through serving others.
